

WHEN YOU NEED CRITICAL AEROSPACE MANUFACTURING EXPERTISE, MERRILL HAS YOUR SIX

Every part, every component, every product in the aerospace industry could be the difference between life and death for both the humans in flight and those living their lives on the ground below. This fact makes every decision you make, from production partners and suppliers to engineering and material sourcing, critical. At MERRILL, we understand the stakes and the responsibility shouldered by our aerospace industry customers and manufacturing partners.

That is why aerospace OEMs and their suppliers have repeatedly chosen MERRILL for over 50 years. From machining and fabrication to assembly and delivery, MERRILL has your six.

1. MISSION CRITICAL

Every production decision matters but never more than with mission-critical products and parts. This is serious work, and it demands serious production partners. At MERRILL, we do whatever it takes to ensure your mission-critical parts will meet or exceed the exacting flight safety and performance requirements in the field.

2. CLASSIFIED FUNCTIONALITY

For over 50 years, MERRILL has carefully guarded the performance specifications, design and material implications of products and vehicles used by our aviation partners every single day.

3. MASSIVE DIMENSIONS

It's always better to have *more than you need* than to *need more than you have*. This is why MERRILL has over 700,000 square feet of manufacturing floor space and custom machinery that can adapt to work on projects ranging from airframes to rocket components to missile launch platforms.

4. EXACTING PRECISION

Achieving the aerospace industry's exacting engineering, light-weighting and fuel efficiency tolerances often comes down to manufacturing differences that can only be measured by lasers. We have the capabilities you need for the accuracy and precision your product demands.

5. DEMANDING MATERIALS

From private aviation to commercial space flight, aerospace projects routinely call for specialized materials and handling. MERRILL's technology, expertise and resources mean that you can get everything you need, all from one source.

6. CUSTOM PRODUCTION

MERRILL was custom-built for secure short-run and bespoke manufacturing projects. So, when your program needs special tooling and precise machining, but the order quantity and tight tolerances make your suppliers wince, MERRILL has your six.
