

WHEN FAILURE IS NOT AN OPTION, CALL MERRILL. WE'VE GOT YOUR SIX

Every decision you make, from the project engineering to the production specifications and from component sources to manufacturing partners, may ultimately decide the success or failure of our peacekeepers and warfighters. From machining to fabrication and assembly to delivery, we understand the stakes.

That is why primes and suppliers serving those who serve have selected MERRILL time and again for over 50 years. Let us show you why we say MERRILL has your six.

1. MISSION CRITICAL

The MERRILL team understands what is at stake so we do whatever it takes to ensure your mission critical parts meet or exceed performance requirements in the field.

2. CLASSIFIED FUNCTIONALITY

For over 50 years, MERRILL has carefully guarded the performance specifications, design and material implications of products and vehicles used by our soldiers and civilians every single day.

3. MASSIVE DIMENSIONS

We offer over 700,000 square feet of production floor, 100-ton lift capacity, one of the largest press brakes in North America, and custom machinery that can adapt for a multitude of large-scale machining, fabrication and assembly projects.

4. EXACTING PRECISION

MERRILL has the capabilities you need to ensure our product meets the most rigorous demands for accuracy and precision for every project, every day.

5. DEMANDING MATERIALS

From rolled armor (class 1 and class 2) to copper, nickel and magnesium alloys, MERRILL is your one-stop-shop for special material machining, fabrication and handling needs.

6. CUSTOM PRODUCTION

Our production facilities were custom-built for secure short-run and custom manufacturing projects, our minimum order quantity (MOQ) is one.
